P10-Upgrade Existing Parks

The Greater North Park Planning Committee feels the widening of streets produce more traffic which is not desired in the Greater North Park Community. The Committee desires projects which provide traffic calming devices which slow traffic and provide a more pedestrian friendly community. The Committee recommends the following projects be modified or removed from the Financing Plan once removed from the Community Plan.

- T1 32nd St.--Landis St. to University Ave.: Remove this project, no widening in residential area.
- T2 Boundary St.--University Ave. to North Park Way: Remove this project.
- T3 Texas St.--El Cajon Blvd. To Madison Ave.: Remove this project.
- T4 Texas St.--Madison Ave. To Camino Del Rio S.: Change project, no widening of Texas St., but add lighting and sidewalks.
- T6 University Ave. Bridge over I-805: Remove this project.
- T7 University Ave.--28th St. to Florida St.: Change project to narrow street and provide traffic calming.
- T8 Traffic Signal Installation: Remove traffic signals #2 and #3.
- T15 Georgia Street Bridge Replacement: This is a Historic Bridge, Community wants the bridge retrofit/repared, and/or rebuilt to historic standards.
